-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This application was filed 6/23/2006 and is a 371 of PCT/JP04/19451 (12/17/2004) which claims priority to JP 2003-431788 (12/26/2003). Claims 1-4 are before the Examiner.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Acemoglu (US 7371865). Acemoglu teaches

(E)-(3R,5S)-7-[2-Cyclopropyl-4-(4-fluoro-phenyl)-quinolin-3-yl]-3,5-dihydroxy-hept-6-enoic acid, calcium salt can be prepared as follows:

on

column 29 having the same process as claimed in claim 2. This is then made into a drug pitavastatin (calcium salt). The pharmaceutical composition is used to treat high cholesterol.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patents 5011930 and 3175944.

'930 teaches the compound (3R,5S)-7-(2-cyclopropyl-4-(4-fluorophenyl)-3-quinolinyl-3,5-dihydroxy-6-heptenoic acid and its pharmaceutical salts and compositions. '930 does not teach the calcium salt. '944 teaches the calcium salt as a

specific pharmaceutically acceptable salt. It would have been obvious to one of ordinary skill in the art to combine the compound of '930 with a known pharmaceutically acceptable salt taught specifically by '944 with the expectation of getting a pharmaceutically acceptable salt. All of the claimed elements were known in the prior art and one skilled in the art could have combined the elements as claimed by known methods with no change in their respective functions, And the combination would have yielded predictable results to one of ordinary skill in the art at the time of the invention.

Further, '930 teaches the compound and its pharmaceutically acceptable salts and compositions. However, the special crystal form, once put into a pharmaceutical composition (which includes water) would lose its special crystallinity. Due to this, the pharmaceutical composition of '930 would be the same even if the '930 does not have the special crystal form.
